2141 CRESCENT AVE.
St. Louis, Mo.

View of Our Fish Hatchery

Located 12 miles west of St. Louis on a 40-acre tract of land. Our facilities for the propagation of fancy fish and water lilies are second to none. Concrete vats 100 feet long are housed in these buildings for breeding tropical fishes. Over ninety large concrete tanks outdoors are stocked with all kinds of water lilies and plants ready for immediate shipping.

When breeding tropical fishes they should not be disturbed. We have found visitors at the hatchery quite a problem to disturb breeding fish and do not allow visitors on the hatchery grounds. All varieties of fancy fish can be seen at our building on Crescent Avenue, where everybody is welcome.

Visitors Welcome

Our location is 6200 West and 2100 North.

Drive to 6200 Easton Ave. and go North on Kienlen to Bailey Place, one block west on Bailey Place.

Via street car—take any street car to Wellston and transfer to the St. Peters bus. Get off at Crescent Ave. and walk one-half block North.

Local and out-of-town visitors are welcome at our exhibition house on Crescent Avenue. We are open daily from 8 a. m. to 5 p. m., except Mondays until 9 p. m.

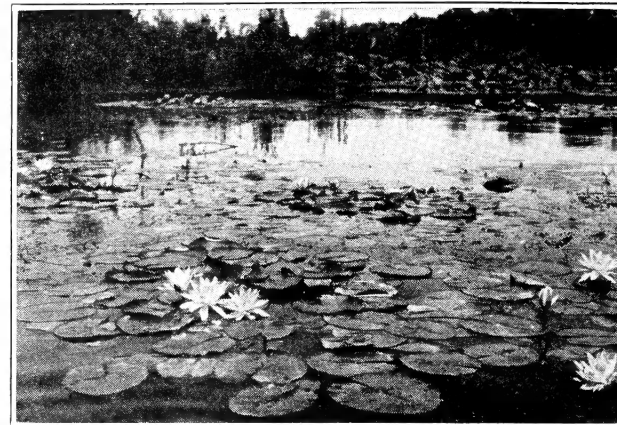

We are closed Sundays and all Legal Holidays.

Phone EVergreen 7265.

View of Our Lily Ponds

Hardy water lilies and many other aquatics are propagated on a 52-acre tract about 69 miles west of St. Louis. The photograph shows the "Sunshine Water Lilies" in a natural setting. The Lotus bed can be seen in the background near the shore line.

We have here about 25 acres under water, where we grow nothing but hardy plants and lilies. These ponds are used only as a source of propagating for shipping stock. No office is maintained on the grounds and they are not accessible to visitors.

FACILITIES

Our facilities enable us to serve you efficiently. Our large volume of business and our many years of experience permit us to give you the highest quality merchandise at lower prices. Most all shipments are made the same day the order is received, except where orders call for seasonable supplies, such as water lilies, etc., for which we place orders on file for spring shipment as early as January and February. Order early! Do not wait until the late spring to order your lilies as we may be sold out of some of the varieties.

We are centrally located and whether you live in New York City or Denver, Colo., fast express trains will reach the destination within 24 hours. We ship to all parts of the world; distance is no object.

Try an order from Beldt's and be convinced of the superior quality of our merchandise.

MERCHANDISE

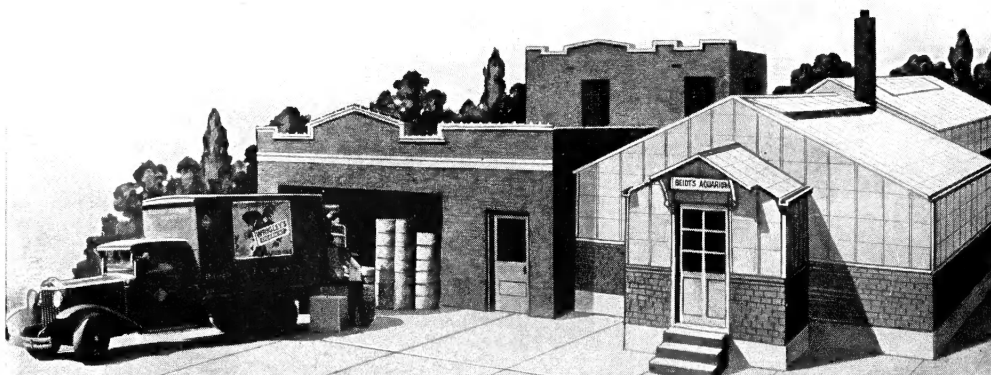

Only Beldt offers a complete variety of aquatic supplies. We offer a complete line of fish aquariums, remedies, fishfoods and heaters. Many features in our catalog are exclusive, such as the especially constructed heavy duty wrought iron and angle iron roller stands with heavy casters for large aquariums, so that these aquariums may be moved away from the window should the necessity arise.

For the pool we also have a very complete line of fancy goldfish, including the rare Lionheads, Orandas and Golden Orf.

You will find our aquarium plants of the highest quality, all greenhouse grown. We guarantee to send you healthy and vigorous water lilies, all true to name, at the proper planting time for your locality. No matter what you want, if you do not find it listed in our catalog, write us.

Customer's testimonials are unsolicited and may be viewed at any time.

THE SUCCESSFUL WATER GARDEN

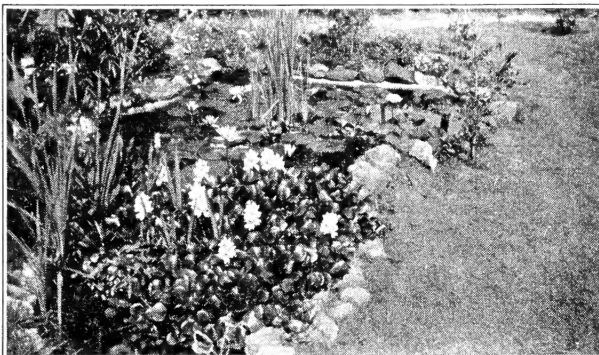

The success with water gardens depends on quite a number of features. One of the most important of these features is sufficient sunlight and equally important is the depth of the pond. A number of subjects may be taken into consideration when you determine the depth of your pool. If you only consider the planting of water lilies, then your pool will be deep enough if you make it from 18 to 20 inches, but if you want to keep goldfish in your pool and you want to keep them over the winter, you should have a certain water depth of usually about 36 inches, and in some localities even deeper water is required. One can readily understand that everything should be taken into consideration in order to have the type of pool that will take care of your particular requirements.

Location

The location of the pool should be where it receives a lot of sunlight. Plenty of sunshine is absolutely necessary for the growth and success of water lilies and all kinds of aquatic plants. Therefore, build the pool away from

large trees and away from buildings in order that it may receive a maximum amount of sunlight.

A pool 3 feet deep is best. In

Lily pool of Silas W. Rogers, of El Dorado, Arkansas, showing a nice growth of cattails, water hyacinths and other bog plants, also tropical water lilies. An informal pool with a rough rock edge.

considering the depth of your pool you cannot disregard the fact that you may want to leave your goldfish in this pool over winter. In a southern climate 20 inches of depth is all that is required to prevent the goldfish from dying over the winter

Concrete Mixture

Use three wheelbarrows full of gravel, two wheelbarrows full of sand and one sack of cement. This makes a good concrete mixture for the average pool. For

all be poured at one time. After these forms are removed, pull these small pegs of wood out of the bottom and fill them in with concrete finish when the pool is finished. This in no way will weaken the general structure of the pool. Reinforcement may be used, though the writer has never used much reinforcement in any pool. At our plant near Florissant, St. Louis County, Missouri, we have around 100 concrete tanks varying in size from 6x10 feet to 20x30 feet and the only reinforcement we used in their construction is that we lay one large iron rod about ½ inch thick into the center of the wall of the pond about 4 inches below the surface of the ground. The contention is that while water freezes, it exerts its most pressure on the concrete right near

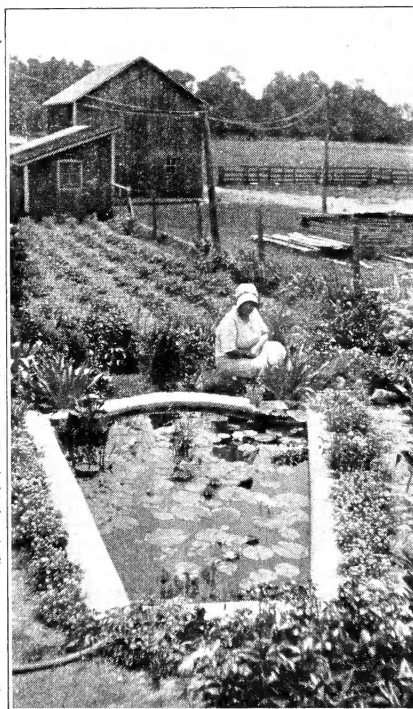

Lily pool of the Baybay Agricultural High School, Philippine Islands. Mr. Fred Warner, principal, writes: "Enclosed are photographs of two of our lily ponds, in which are blooming fifteen kinds of Beldt's water lilies. Of course the pictures give no idea of the color display."

finishing work you should use a wheelbarrow three-quarters full of sifted sand to one sack of cement. All concrete work should be in the neighborhood of six inches thick. Reinforcing of this concrete may be accomplished through the aid of ordinary chicken wire laid in the center of this concrete. The sloping walls of the informal pool have a great tendency to prevent breakage as the pressure exerted when the water freezes during the winter time is not as great as if the walls were straight. Therefore, the slanting walls really have two good features; one is that they do not crack as easily during the winter time, and the other that it is much cheaper to build the walls than if you would have to build a form to retain them.

The Formal Pool

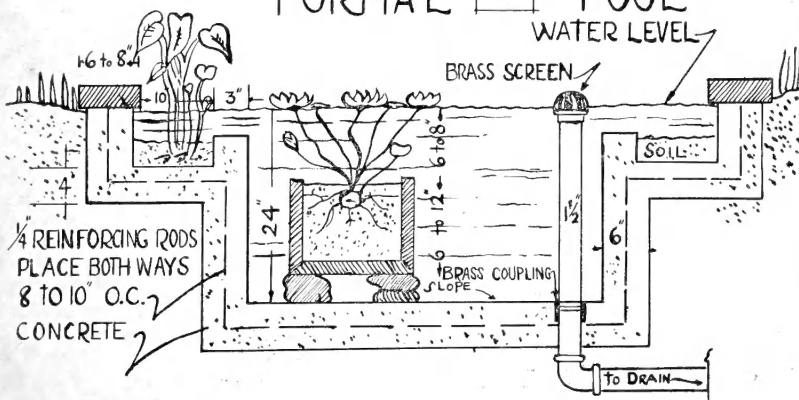

Formal pools may be constructed in all various shapes. The formal pool as a rule is built into the center of the garden or near the center. In constructing the form work for a formal pool, it is a good practice to set this form work about six inches from the bottom on small pegs of wood so that the bottom and sides can

Mrs. E. T. Young of Warren, Indiana, enjoying the fragrance of water lilies in her pool.

the ground level, or as far as the pool is filled with water. It does not exert any pressure below the ice.

DETAILS OF CONSTRUCTION FORMAL POOL

Let Beldt Supply Your Lily Pool Requirements

and be assured that our 20 years of growing and selling water lilies and fancy fish to thousands of customers all over the world guarantees you absolute satisfaction. You will find our prices very reasonable and the water lilies which we ship all true to name and all healthy and vigorous plants. You will find our collection most complete. No other grower can offer you better quality and lower prices.

HOW TO PLANT YOUR WATER LILIES

Hardy Water Lilies

Can be planted at any depth from 12 inches to 48 inches. They will, however, do best at a depth of about 12 inches because the deeper you plant them the more strength is consumed in under water growth; also the flowers are not quite as strong if they

the water surface of the pool so that the tropical lilies are not more than 6 inches below the water surface, or else raise the box by placing several bricks under it. Then after the lily has been growing for a month and is well established in your pool, you may lower this box. For planting tropical water lilies use boxes at

of your lily pool tremendously. The planting of water lilies is really not different than planting most other kinds of plants except that you set them under water. Never plant your water lilies first and then fill the pool. It is best to have the pool filled at least a week in advance so that the water has had a chance to get warm. The newly planted lilies will grow much better in aged water than in fresh water. Plants do best, and you keep your pool much cleaner, if you do all your planting in various boxes instead of covering the entire bottom of your pool with soil. Never use any kind of metal containers.

The Care of Goldfish

While we cannot go into the details of breeding and propagating, etc., as this would be too lengthy a subject, we would like to call your attention to a small booklet, "Goldfish and Their Care," which we have listed in this catalog and which can be sent to you for 15c, postpaid. It describes all the diseases and how to prevent them. It also describes the breeding habits and other details useful to you in learning the successful methods of handling goldfish.

We wish, however, to bring out a few important points which everyone should know who keeps goldfish in a pool. In the average pool of three-foot depth, goldfish may be left out during the winter without any danger of loss except if the pool is crowded. That is, if you have raised a lot of goldfish and the pool is very crowded with them, then you should dispose of your surplus goldfish in the fall of the year and only keep as many goldfish in the pool as you desire to start with next spring. Goldfish become almost lifeless as the water freezes. It must be remembered that they are cold blooded creatures and the colder the water gets, the less they breathe. In fact, after the ice

once forms on your pond, you may quit feeding the fish as they do not consume any food until after the ice has disappeared and the water again becomes warmer.

If you wish to bring the fish indoors into the living room for the winter, or keep them in the cellar, adequate provisions must be made to take care of them. Most people overcrowd these goldfish and lose them. When keeping goldfish in an aquarium or trough over the winter, you should not keep over two inches of fish to the gallon of water. It is best to keep them in a cool place. Of course, you can keep them in a warm living room over winter, but if the temperature is 70 or above, then at the most you should keep only one inch of fish to the gallon of water. If a goldfish is two inches long and has a tail two inches long, then you should have four gallons of water to keep it in.

Fish Can Not Be Put In a New Pool

A newly constructed pool must be seasoned. That is, when the pool is filled with water for the first time the water absorbs the lime contents in the concrete. This is fatal to the fish as their fins get ragged and rotten. It usually ends in Fungus which is a white cotton like growth on their fins, tails, and body.

How To Prevent Fungus In a New Pool

There are two ways to prevent Fungus in a new pool. The old method is changing the water after letting it stand for about a week. Three changes of water usually removes all this lime sufficiently to prevent any further trouble. The other method is the use of waterproof enamels. These waterproof enamels are listed elsewhere in this catalog and may be obtained in various colors. These asphalt enamels should be applied to dry concrete only, as this asphalt will not adhere to damp walls. Therefore, great care must be taken to see that the concrete is absolutely dry. This asphalt enamel can be supplied in the Black color at \$1.50 per gallon or in 5 gallon cans at \$6.00. One gallon of this enamel will cover from 150 to 250 square feet of surface, all depending on how thick you desire to apply it and how smooth the concrete work is. The thicker you put it on, the more effective is the protection it affords. Asphaltum enamel also stops many leaks as it seeps into the porous concrete. Another quality to be considered is that the asphalt enamel coating prevents algae and other slimy mosses from taking root in the concrete. The water stays clearer and does not get green nearly as quick.

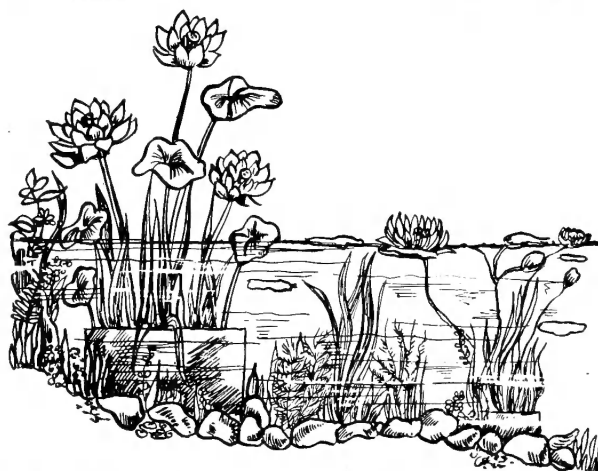

Mrs. Arthur Flesh, of Sea Breeze, N. Y., has included a pool on her home grounds which blends in nicely with the balance of the planting

are planted too deep. Use good, rich soil and for each bushel of soil add one pint of our Magic Water Lily Food, which comes in one pint cartons at 35c each. This will insure a vigorous growth and will build up the soil to last for at least two or three years. It is best to lay the hard water lily root flat about 3 inches below the surface of the soil in the box and do not forget to put about 2 inches of sand on top of the box to keep the water clear.

Tropical Water Lilies

Are shipped after the weather is warm, which in the latitude of St. Louis is about May 20th. Southern shipments are made as early as the later part of March. The important thing in planting tropical water lilies is not to plant them any deeper than they have been growing in the pot. Pack the soil down solid so that the compact root growth in the pot in which the lily has been grown will not settle to the bottom of the lily box. In other words, if you leave the soil loose and plant the lilies, there is danger that the clump of dirt in which you receive this tropical lily will settle down to the bottom of the box. Do not plant the tropical water lily too deep. It is best to lower

least 16 inches square and 12 inches deep. Fill them with good rich soil and use $\frac{1}{2}$ pint of our Magic Water Lily Food to each box. Very good results and wonderful effects may be had by using a 20 inch square box and planting two tropical lilies to one box. This will give you more flowers from one box and you can also plant different colors and improve the general appearance

Planting things on the bottom of the pool in pots or boxes is to be preferred to placing soil directly in the bottom of the pool. It is easy to make small wooden boxes or you may use the regular fern pots which are squat shape flower pots. They do not tip over as easy as the standard size pots.

TROPICAL WATER LILIES... DAY BLOOMER

BLUE COLORS

C. J. Clark

A new, very deep blue hybrid producing flowers 8 inches across, borne on strong stems well above the water's surface. Nicknamed by W. T. Innes, "Deep River." Named in honor of our water lily grower, C. J. Clark. A fine, deep blue. Price\$2.50

See Front Cover.

Henry Shaw

Named in honor of the founder of the Missouri Botanical Gardens. Flowers beautifully blue. Delightfully fragrant. Price each\$1.50

William Stone

This is a beautiful and attractive deep blue-purple lily. The flowers are 8 inches across and star shaped. Price each.....\$1.25

*Mrs. Edward Whitaker

The largest flowering day blooming hybrid from Ovalifolia and Castaliifolia. Colors in shades of light blue or dark blue. Price each.....\$1.50

*Dauben

A well-known viviparous day bloomer. The small light blue flowers are produced freely. A good plant for small pools and aquariums. Price each.....\$1.00

*Marmorata

This variety produces perhaps one of the most beautiful leaves of all tender nymphaeas. The leaves are medium green colored with large blotches and squares of brown. The flowers, which are 12 inches across, are blue on the first day they are open and gradually become lighter. (See color illustration on page 5.) Price each\$1.75

Blue Star

A beautiful deep blue variety about 7 inches across, the flowers at times are carried 18 inches above water. A very strong grower and prolific bloomer. Price each.....\$1.25

Colonel Lindbergh

A deep caerulean blue variety producing flowers up to 12 inches across which tower well above the water. The oval shaped leaves are blotched with brown. Price each.....\$2.00

Gracillis Rubra (Red Star)—\$2.00 each

BLUE COLORS—Con't.

*Mrs. Woodrow Wilson

A hybrid produced from Mrs. Woodrow Wilson and Castaliifolia. A dark lavender-blue flower, 8 to 10 inches across. Price each.....\$1.50

Violet

A hybrid produced by George Pring. This plant produces distinct curly-edged leaves. Flowers up to 8 inches across are produced in abundance. Colors violet-blue. Fragrant. An outstanding recent introduction. Price each\$2.00

Wm. T. Innes

A sky blue water lily producing large 8 inch flowers in abundance, the leaves are speckled brown, does extremely well in shady pools as well as in sunny exposures. A hybrid of Zansibar rosea and Mrs. G. H. Pring. Our own creation. (See No. 2, Page 8.) Price each.....\$2.00

BLUE COLORS—Con't.

Blue Bird

A full flowering navy blue hybrid. The flowers are 8 inches across and produced in abundance. A very good blue. N. Y. Bot. Gardens. Price each.....\$1.50

Pennsylvania (Blue Beauty)

Deep blue flowers which get a foot across if plant is given enough root space. The leaves are speckled brown. A good plant for small or large pools. Price.....\$1.50

PURPLE SHADES

*August Koch

Produced in the lily pools at Garfield Park, Chicago, by Mr. August Koch. The flowers are purple lilac and the petals a pale violet color, 7 to 8 inches in diameter, open four to six days. Price each.....\$1.50

*Royal Purple

A hybrid produced by A. S. Buskirk. A very deep red purple and a strong grower. Flowers 5-6 inches across. Very fragrant. An outstanding recent introduction. (See No. 8, Page 8.) Price each\$2.00

*Panama-Pacific

A hybrid produced by William Tricker. The predominant color is reddish-purple and the stamens are yellow. Very fragrant and most prolific in blooms. Price each\$1.50

Imperial

A hybrid from August Koch and Caerulea producing very fragrant purple flowers about 6 inches across. A strong grower. Good for smaller pools. Free flowering under crowded conditions. Our own hybrid. (See No. 4, Page 8.) Price.....\$1.25

PINK SHADES TO RED

General Pershing

A hybrid from Mrs. Whitaker and Castaliifolia. The pink flowers are delightfully fragrant and open early in the morning. Strong plants. Price each.....\$1.50

Rio Rita

A very brilliant pink, almost red. Base of stamens bright gold. Different shades of pink in sepals, petals and stamens. A riot of colors, creating a brilliant effect. Produced by G. H. Pring. Price\$5.00

Zansibar Rosea

A delightfully pink shaded day blooming lily producing flowers about 6 to 8 inches across, very free flowering. (See No. 5-6, Page 8.) Price each.....\$1.25

Pink Pearl

A beautiful large cup-shape clear pink. A strong bloomer, very fragrant. Flowers 8 inches across. Price\$1.50

*Mrs. Sawyer (Independence)

A new viviparous day blooming lily, the leaves are shaded with brownish red and the flowers are very deep pink. Very vigorous and free flowering. Price each\$1.50

Rose Star (Mrs. Ward)

The flowers are carried well above water and get about 8 inches in diameter. They are of a beautiful rose-pink color with long golden stamens. Price each\$1.50

Gracillis Rubra (Red Star)

This star lily has wine red flowers which like the other star lilies are carried well above water. Price each.....\$2.00

(See front cover)

Shirley Marie

A large flowering deep pink of unusual merits. The flowers are 10 to 12 inches across. Very free flowering and attractive. A strong grower. N. Y. Bot. Gardens. Price each.....\$2.50

WHITE

Mrs. George H. Pring

A new water lily, pure white in color, flowers 8 to 10 inches across. Very fragrant and prolific. (See No. 1, Page 8.) Price each\$1.50

(See front cover)

Snow White

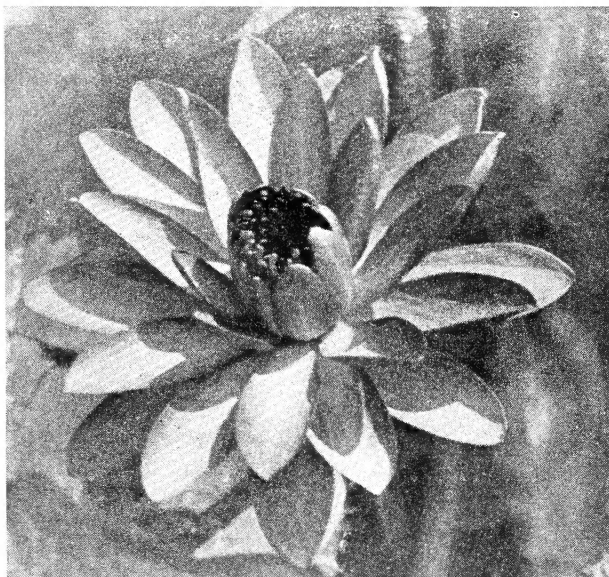

A hybrid produced from the Independence through self pollination, the flowers are carried erect on a strong stem, are cup-shaped and 6 to 8 inches across. One of the best white tropical lilies. Our own creation. (See No. 3, Page 8.) Price.....\$2.00

*All lilies with star in front of name are viviparous, which means that young plants are produced from center of leaves. Tropical lilies should not be planted until latter part of May, or early June, and they should only be planted about 4 or 5 inches below water surface.

A new tropical Water-Lily is the variety William T. Innes. It produces sky-blue flowers about 8 inches across

NIGHT BLOOMING TROPICAL WATER LILIES

Sturtevant

Victoria Crouziana

The leaves are 5 feet in diameter and the white flowers are 1 to 1½ feet across. Should be planted in at least 8 cubic feet of dirt and requires a water surface of 100 square feet at least to bring it to perfection. Only for very large pools. Price each\$8.50

Lotus Dentata

The flowers are large and cup-shaped. The petals are white and pink tipped. A strong and vigorous grower. Price each.....\$1.00

Devonshire

Bright, rosy red flowers, 8 to 10 inches across, flowers well above the water. Price each.....\$1.25

Frank Trelease

The flowers are tyrian, pink with dark bronzy-red leaves. Price each.....\$1.25

Juno (Dentata Superba)

A magnificent white night bloomer. Flowers from 8 to 12 inches across. The petals are wide open and give the flower a flat appearance. Price each.....\$1.50

H. C. Haarstick

A new hybrid produced by the Missouri Botanical Gardens. Its color may be described as a rare lavender-pink. The large flowers are carried well above the water and at times attain a size of more than 12 inches. The reddish-brown leaves are a beautiful addition. Without question the finest night bloomer. Price each\$2.00

Rubra Rosea

A native lily of India, producing rosy carmine flowers, 6 inches across. The flowers are star shaped and borne freely. Price each\$1.50

Sturtevant

A beautiful bright red flower, 8 to 10 inches across, requires a large planting box for roots with plenty cow manure mixed in to bring it to perfection. Price each\$1.50

Omarana

Shaded pink in center and gradually diminishing in color until the tips are almost white. Flowers 6 inches across, a prolific bloomer. Price each.....\$1.50

Missouri

Missouri

The best white night blooming tropical lily. Plant it in at least two cubic feet of rich soil to bring it to perfection. Price each\$2.50

Egyptian Collection

1 Lotus Dentata, 1 Omarana, 1 Rubra Rosea. All three for...\$3.75

NOTE

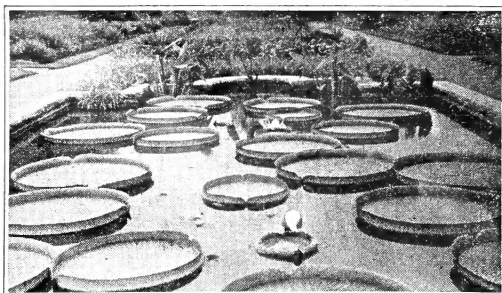

Every pool should contain at least one of these varieties of lilies, as they bloom at nights when all other water lilies are closed; therefore, giving you flowers 24 hours of the day. We only list the finest new Hybrids produced.

Emily Grant Hutchings

Emily Grant Hutchings

A pink shaded night bloomer which produces immense large cup-shaped flowers. Price each\$2.00

Victoria Crouziana

Mr. Martin Vander Vaer, of New Haven, Conn., is well pleased with plants received from us

BELDT'S QUALITY WATER LILIES ALWAYS GROW

TROPICAL WATER LILIES

Collection No. 27

No. 1. Blue Star.....	\$1.25
No. 2. General Pershing.....	\$1.50
No. 3. August Koch.....	\$1.50

Special Collection Price for this Crown Trio \$4.00

These three Water Lilies photographed in natural colors are set against a background of natural color photograph of Blue Star Water Lilies in one of our pools. The Blue Star carries its flowers on strong stems about 2 feet or more above the water surface. Tropical lilies are fragrant, large and make ideal cut flowers.

Please Notice

Most of our tropical lilies will bloom at least one week after shipping. Lots of them are shipped with flower buds so that you may expect an immediate effect. Too often customers insist on early shipments, which is a mistake based more on inexperience on the part of the water gardener. In the latitude of St. Louis, Tropical Lilies should never be planted before May 20. Allow us to ship your tropical lilies at proper planting time and you will never be disappointed with results.

Little Rock, Ark.

We had these same lilies last summer and they were a source of constant joy to us, blooming throughout the summer and even past the first few frosts. Scarcely a night during the whole summer were we without blossoms from both lilies.

MISS ORA PARKER.

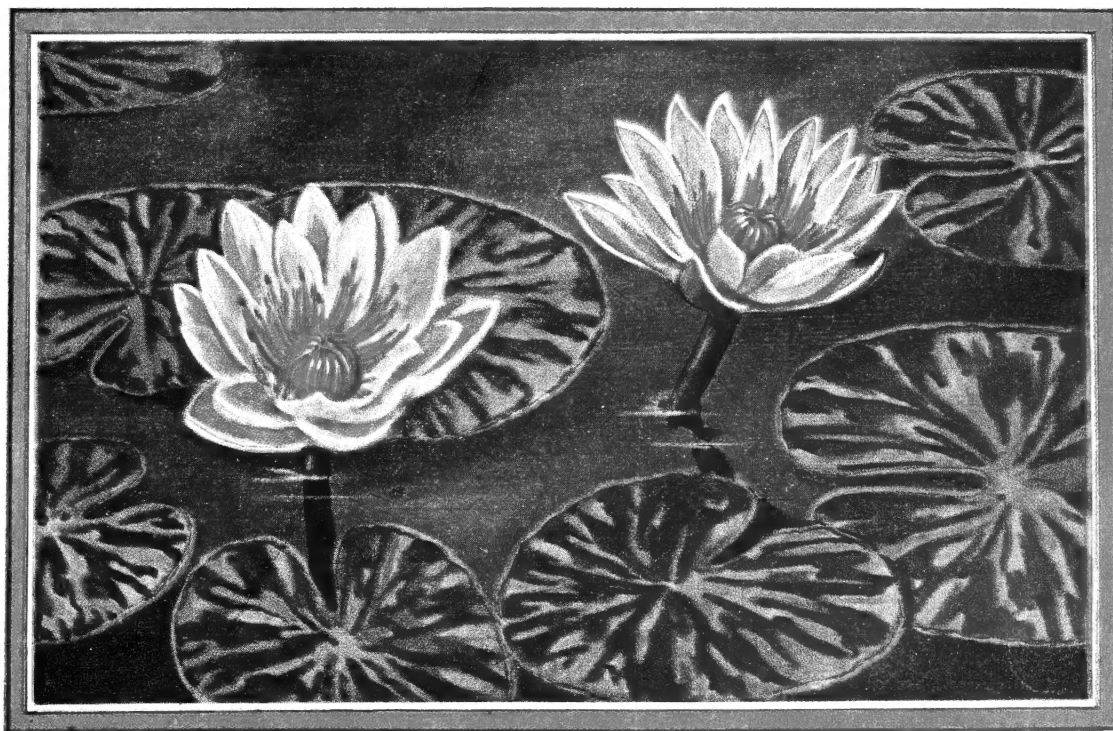

Winnsboro, Tex.

Last year I bought a lily from you and it had blooms the next day after setting it out.

MRS. R. A. MARTIN.

Marmorata

A lavender-blue day bloomer. A tropical lily with beautiful colored leaves. The color of the leaves is medium green with dark greenish-brown blotches. The leaves are an attraction as well as the large flowers which are produced in abundance. Price each.....\$1.75

TROPICAL WATER LILIES

Collection No. 20

Our Beauty Collection

A group of four popular varieties, fragrant and prolific bloomers that attract attention in every garden. A very pleasing color combination. Flowers from 8 to 12 inches across.

- | | | |
|--------------------------|------------|--------|
| 1. Omarana. | Each | \$1.50 |

Special Collection Price \$5.25

H. C. Haarstick

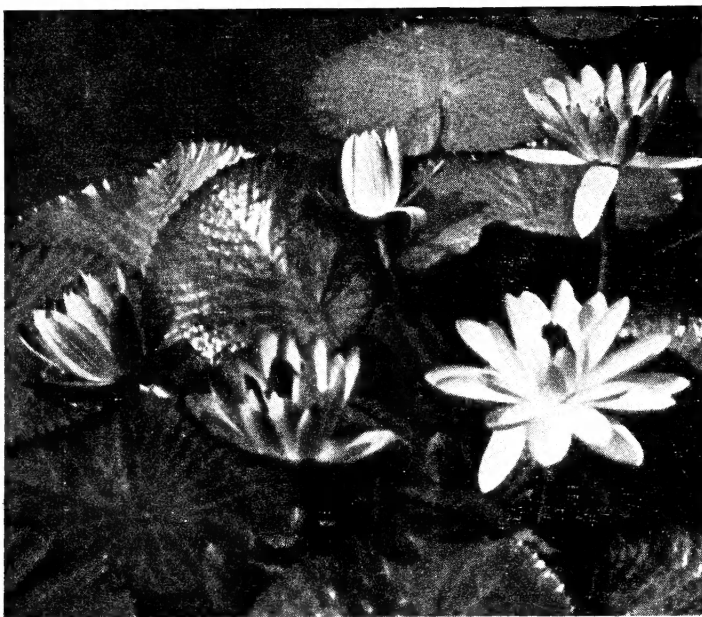

A new night bloomer, which has flowers of beautiful shades of lavender-pink. Large plants will produce flowers of 12 inches or more in diameter. They are very strong growers and bloomers, and one plant will produce as many as 150 flowers during the summer months. The leaves are reddish-brown in color. A feature which makes it so much more desirable is that the beautifully colored leaves add greatly to the attraction of the pool. H. C. Haarstick should be in every collection. Price each**\$2.00**

1 H. C. Haarstick and

1 Marmorata

(See Marmorata on page 3.)

Special price**\$3.50**

Sturtevant

The newer hybrids have not been able to push this old-timer in the background. Still considered tops with many water lily fanciers. A red night bloomer that has everything.

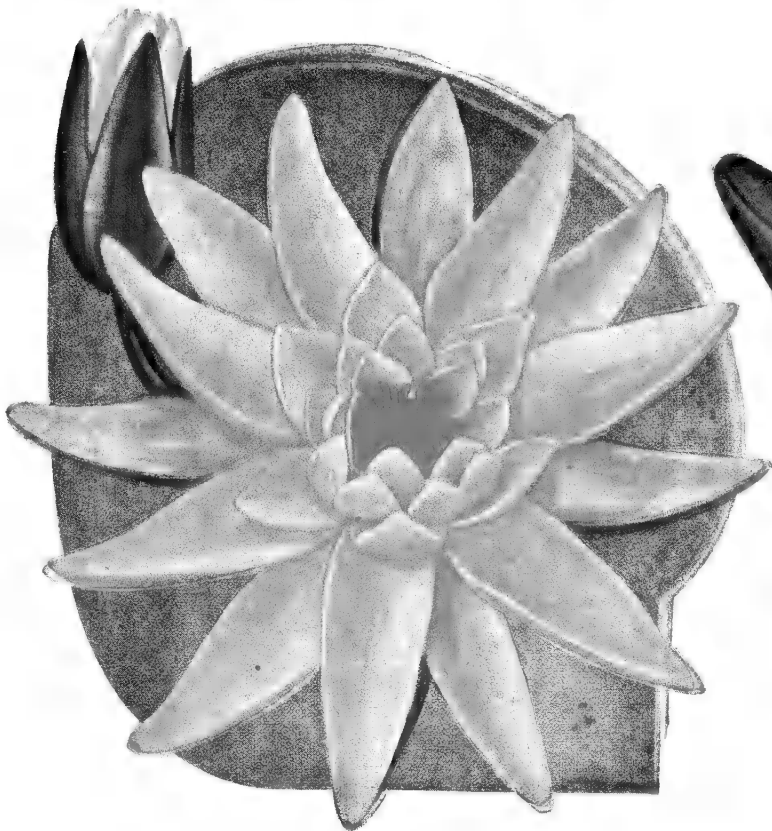

Price**\$1.50 each**

New Trailing Arrow Head

This new arrow head throws out long runners, some getting as long as 6 feet. It has beautiful, deep green, leathery, arrow-shaped leaves. This plant is not hardy but can be equally as well used as a house plant over the winter months. Very attractive in outdoor pools. Plant so that pot is half-way submerged in water.

Large plants.....	\$0.50
Smaller size.....	.25

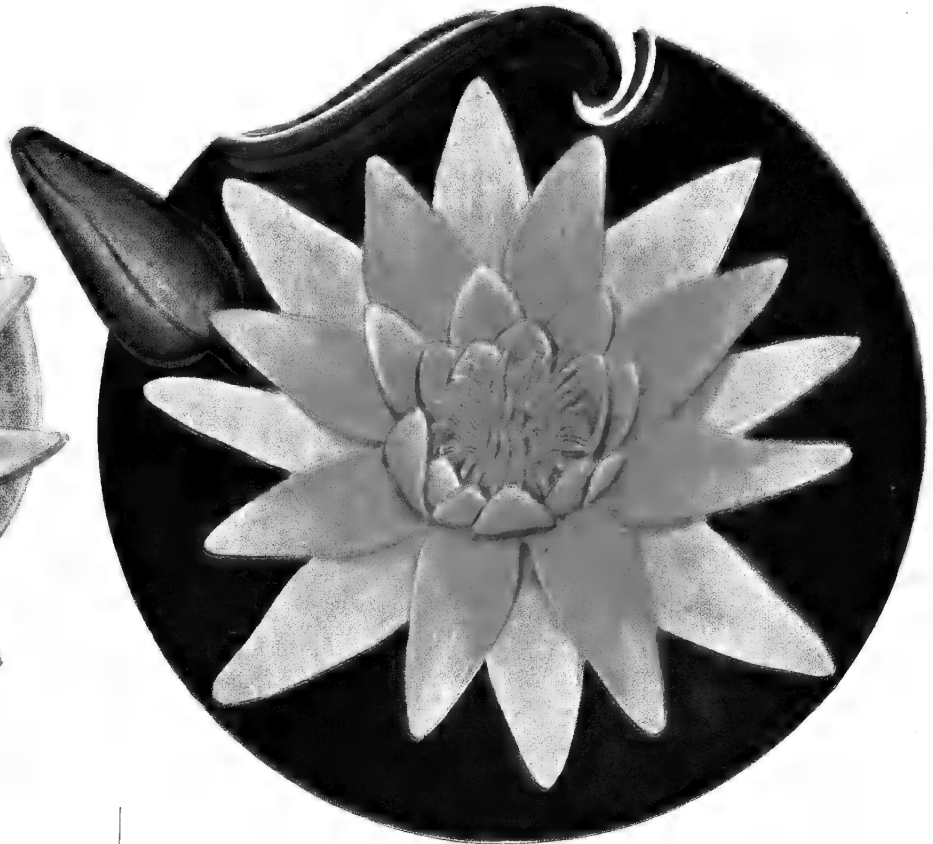

Hardy Water Lily

Rose Arey

Without question the finest hardy pink. The petals are long and oval-formed and uniform deep pink.

Each.....\$1.50

Comanche Hardy Water Lily

The rich apricot and red markings upon opening, changing to deep copper and orange shades, create a contrast so much that one lily seems to have several different colored flowers at one time. Vigorous and free flowering. Price each.....\$1.50

Hardy Water Lily

James Brydon

This free flowering cup-shaped lily is of deep rosy crimson color and a very strong bloomer.

Each.....\$1.50

Water Poppy

Each.....\$0.15

Shallow Water Plants

Shallow water plants add a decided touch to the pool. A pool properly planted with these plants does not look so artificial. A number of plants also thrive near the pool where the soil gets moisture from the water in the pool. If the pool is built on higher ground, there are ornamental grasses and other garden plants that can be used for backgrounds or the ends of the pool to complete a most perfect picture.

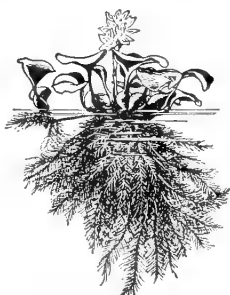

See Page 16 for Shallow Water Plants

Collection No. 18

For Large Pools

- 12 Iris Versicolor (hardy blue flowers)
- 12 Oxygen Plants (all hardy)
- 12 Floating Plants (different, not hardy)

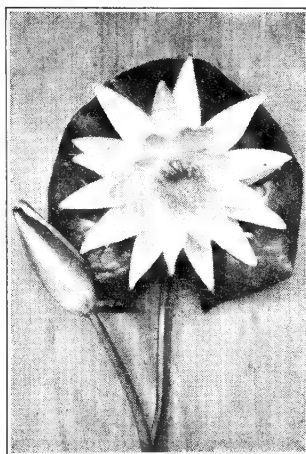

Postpaid for \$3.00

Water Hyacinths

Dozen.....\$1.00

Besides Water Lilies there are smaller miniature plants that grow like lilies. Others float on the surface and some grow entirely submerged and produce oxygen. Include a few of these for practical purposes, as well as adding a little touch of variety.

Odorata Sulphurea Grandiflora. One of the best fragrant yellow water lilies.
Each\$1.25

Torrington, Conn.

Ours is a non-commercial proposition, the blooms being used by Mrs. Travis for hospital and shut-in calls. I am writing to say your stock received through Moscarillo's was up to your standard, which is all one can say of any product.

FRANK M. TRAVIS.

Baraboo, Wis.

The plants you shipped me arrived Saturday. They sure are fine healthy plants. If your cheapest plants are so good, your expensive ones must be wonders.

Hardy Lily — "Paul Hariot"

Our water lilies in the natural pool at the Garden City Press, Gardenvale, Quebec, Canada

West View, Pa.

Your recent shipment of plants arrived in excellent condition, and I believe they were the healthiest I have ever received from a dealer.

E. J. HALTER.

Oklahoma City, Okla.

The water lilies I ordered from you last year were the most satisfactory I have ever had.

MRS. EDITH NICHOLSON.

Yellow Pigmy

A hardy dwarf water lily. Ideal for small or large pools. Flowers are produced in abundance. Will not show its best in shady places.
Price\$1.00

Schenectady, N. Y.

Wish to let you know that the water lilies bloomed wonderfully well all summer: Rose Arey, a beauty; James Brydon, 4-6 all the time; Escarboucle, 5-8 all the season; Chromatella, a beauty; the White Gonnere is a sight to be seen, 4 to 6 open and very large. I am well pleased with my water garden, thanks to you.
M. J. HOGAN.

SPECIAL COLLECTIONS OF HARDY WATER LILIES

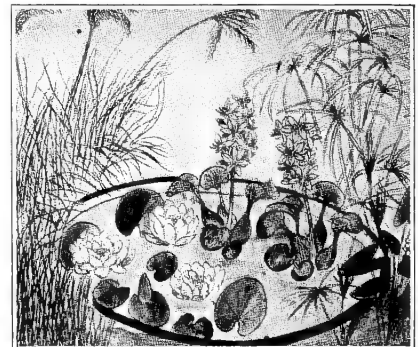

HARDY WATER LILIES

Sunrise

Without question the finest hardy lily. The yellow flowers which are unusually large and cactus-shaped resemble a yellow dahlia. It is of a uniform yellow color and surpasses all other yellow water lilies. A great feature is the unusual fullness of the three rows of petals.

Price each.....\$1.50

Floating Plants for the Pool

See our complete list of floating and aquatic plants which can be used for indoor aquarium or lily pools on pages 17 and 18.

Parrotsfeather

Per dozen.....\$0.40 Per 100.....\$1.50

This photograph was taken by Mr. William G. Schumm, La Porte, Indiana. Mr. Schumm is well pleased with the Egyptian Lotus he received from us, and he advises that he left the plant out in the water tub all winter without any protection.

IRIS SIBERICA

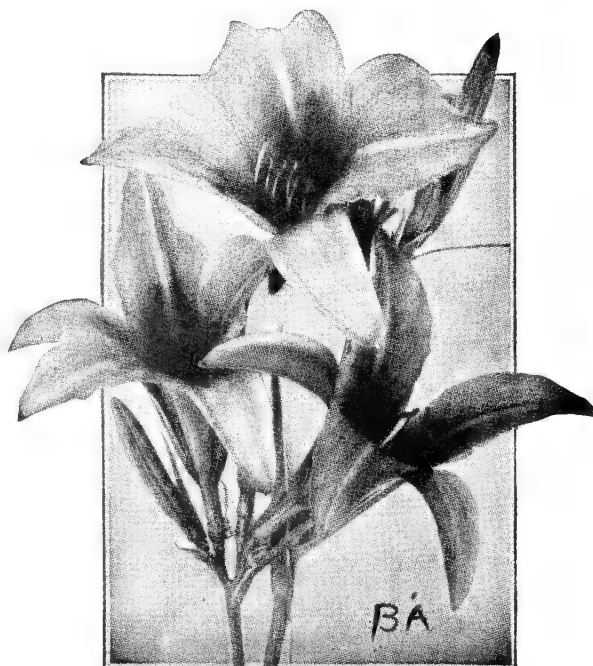

The aquarium, plants and stand, etc., were very satisfactory.
MRS. L. E. DALAGER, Austin, Minn.

Just a line to thank you for the swell way in which you handled my order. You are a swell company and I will always have a good word for you.

MRS. C. J. KLEEMAN, Shuyler, Neb.

I have been dealing with your firm for the past two years and have been more than pleased with your merchandise and service.

R. W. LINDER, Chicago, Ill.

HEMEROCALIS FULVA

OUR WATER LILIES IN AUSTRALIA

This photograph was mailed to us by R. W. Mildred, 50 Hughes Street, North Unley, South Australia. Tropical water lilies are not grown commercially in Australia. We only shipped the tubers as this was much less expensive, and this picture shows the results of the quality tubers we are able to supply. Of course it is much easier if you can set out the lily plants already developed but in Australia, when we have summer here it is winter there, and it would not have been very practical for us to ship tropical water lilies during the winter.

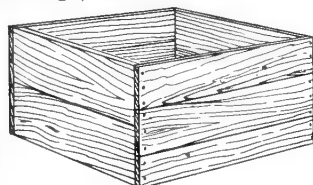

POOL PAINTS AND FERTILIZERS

Magic Water Lily Food

Beldt's Magic Water Lily Fertilizer and Plant Food

Has been perfected after years of experimenting. Magic does not foul or sour the water in your pool and leaves it absolutely free of foreign colors. In our experimental pools Magic Water Lily Food proved that flowers will double in size and that especially newly planted water lilies and all other aquatic plants will make as much growth in one month as they would in two months if planted in ordinary soil. Use 1 pint of Magic Water Lily Food to mix with 1½ bushels of soil. Complete directions with every carton.

1½ pint cartons, each.....\$0.50
5 lb. bags, each.....1.25

Special Water Lily Boxes

These boxes are shipped ready to use, and are made from special asphalt-treated lumber to last for years under water.

Size	Deep	Long	Wide	Price Each
No. 1	8"	10"	10"	\$0.85
No. 2	10"	18"	18"	1.60
No. 3	15"	22"	22"	2.80

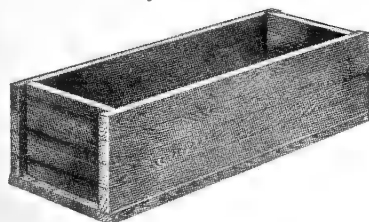

Asphaltum Enamel

A new pool does not have to be seasoned if the pool is painted one coat of asphaltum enamel. The concrete walls must be perfectly dry when applying this enamel. Just give it one good coating, let it dry 24 hours and it is ready to be filled. Black asphaltum enamel also has the advantage of keeping algae from forming on the walls. We can supply this enamel in black, green and blue. One gallon of Asphaltum enamel will cover a surface of about 150 sq. ft., all depending on the smoothness of the concrete finish.

Per quart, Black.....\$0.50
per gallon, Black.....1.50
In 5-gallon cans, Black.....6.00
Per gallon, Green or Blue.....4.00
Per quart, Blue and Green.....1.20

We do not pay expressage on pool paints.

Asphalt Enamel cannot be sent by mail

Wooden Water Troughs

These Redwood troughs are ideal for putting goldfish eggs in to hatch or to bury in the ground for a small pool. They are coated on the inside with asphaltum so that they are absolutely waterproof and do not require seasoning.

These troughs are also good for over-wintering goldfish and plants in the cellar.

Size 5 ft. long, 1 ft. high,
2 ft. wide.

Price Each \$8.00

Made from 2-inch thick Redwood.

Colored Lily Pool Paint

We highly recommend Sealment Water Proof Paint especially prepared for cement walls and lily pools. After testing many materials manufactured for this use we selected Sealment as the best. If Sealment is mixed properly and applied according to complete directions which are furnished with every can, it will last as long as the pool itself and forms a part of the pool and not merely a surface coating. It is ideal for stopping leaks in pools. Sealment contains no poisonous chemicals, however, on account of lime content, pool must be seasoned with change of water before placing fish in same. Sealment Water Proof Pool Paints can be supplied in following colors:

White, Blue, Green

Price per 5 lb. can for all colors except Green.....\$2.00
Price per 5 lb. can, Green.....2.50

Directions

Five lbs. of Sealment Pool Paint will cover 150 square feet. Sold only in 5 lb. cans and we can not supply this in any other quantity. You will find complete directions for use with every can.

Hopkinsville, Ky.

My orders of water lilies, etc., arrived in grand shape. Thanks.

MRS. BEN WEBB.

(Iris versicolor), a tall growing iris, producing beautiful blue flowers, the sword-shaped leaves resembling the Japanese iris. Hardy.

Each.....\$0.20 3 for.....\$0.50

Arundinaria Tecta

A graceful hardy bamboo. A strong grower producing a beautiful tuft or seed pod which turns to a bright golden color in the late fall. A beautiful late fall effect when everything else about the pool has gone to rest. Hardy.

Each.....\$0.50 3 for.....\$1.25

Canna Flacidda

An aquatic canna producing yellow flowers; this plant grows about 2 feet high and does well in shallow water. Not hardy.

Each.....\$0.25 3 for.....\$0.60

Lizard's Tail

A pretty plant for shallow water, producing fragrant white flowers, grows 2½ feet high with heart shaped leaves. Hardy.

Each.....\$0.20 3 for.....\$0.60

Imperial Taro

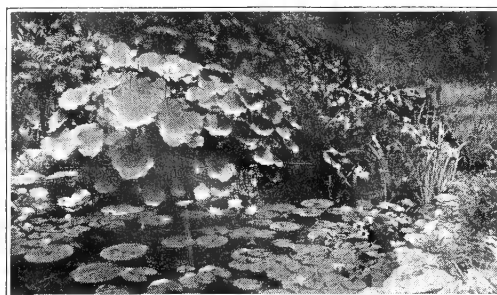

The leaves are light green and beautifully blotched in dark violet colors; grows about 2 feet high.

Each.....\$0.65 3 for.....\$1.75

Violet Stemmed Taro

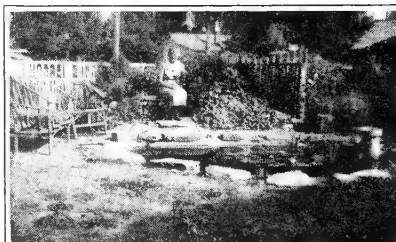

The deep green leaves are pronounced through the addition of dark red ribs, grows about 2 feet high. One of the best.

Each.....\$0.65 3 for.....\$1.75

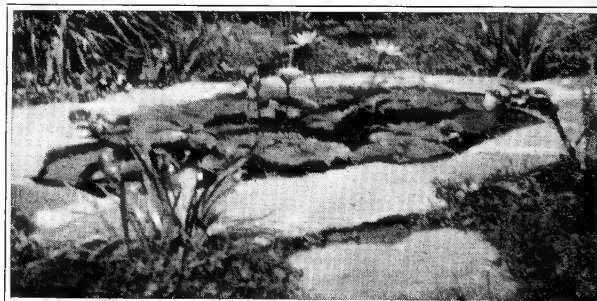

"LOTUS IN MY POOL"

This photograph was sent in by Mr. Sam Caldwell, of Nashville, Tenn. For larger pools having enough space for the planting of lotus (a box 24 inches square and 12 inches deep is sufficient), they can be highly recommended. They are very hardy and multiply rapidly. While many plants do not bloom the first year, quite often plants will make several flowers the first season.

This lovely pool belongs to Mrs. Kirstine Parker, Tremonton, Utah. Mrs. Parker was more than satisfied with plants received from us.

All plants listed in this catalog are priced f.o.b. St. Louis except when collections are specified postpaid. Kindly add postage to your zone.

Mrs. Clifford Nordberg, Abnandale, Minn., sends this picture of her pool and writes:

Dear Sir: My first pool and lilies have been such a success that I feel I must share a little of my joy with you, since my lilies came from your firm. The lilies were just beautiful and bloomed all summer. My Blue Star had as many as three flowers at once and at least four other buds ready to open. Mrs. Sawyer was also beautiful and bloomed all summer.

Sagittaria sinensis

Sagittaria natans

Sagittaria subulata

Giant Anacharis
(Elodea)

Valissneria

Cabomba

Miriophyllum

NEW AND RARE VARIETIES OF GREENHOUSE-GROWN AQUARIUM PLANTS

Valissneria spiralis

The Italian variety, common name eel grass. The most popular plant for the tropical fish aquarium.

Each.....\$0.05 6 for.....\$0.20
Dozen.....\$0.35
50 for.....\$1.25 100 for.....\$2.25

Cork Screw Valissneria

Similar to the Italian Valissneria except that the leaves are twisted somewhat similar to a spiral. A novelty.

Each.....\$0.10 6 for.....\$0.30
Dozen.....\$0.50

Sagittaria Lorata

A fountain shaped Sagittaria with rigid pointed leaves 1/2 inch wide. Grows about 6 inches tall.

Each.....\$0.15 6 for.....\$0.75

Sagittaria sinensis

A fine plant for both gold and tropical fish.

Each.....\$0.10 6 for.....\$0.50
Dozen.....\$0.90

Sagittaria natans

A good plant for tropical and goldfish tanks.

Each.....\$0.10 6 for.....\$0.50
Dozen.....\$0.90

Sagittaria subulata

One of the best plants for tropical aquarium; grows about 6 inches high.

3 for.....\$0.10 50 for.....\$1.25
Dozen.....\$0.35

Giant Valissneria

Grows from 24 to 36 inches long, for large tanks.

Each.....\$0.10 6 for.....\$0.50
Dozen.....\$0.90

Giant Anacharis

One of the best oxygen plants for gold and tropical fish.

Per bunch \$0.15 6 bunches \$0.75

Cabomba or Washington grass

One of the prettiest of water plants. Does well in gold and tropical fish aquariums.

Per bunch \$0.15 6 bunches \$0.75

Miriophyllum

Common name Millfoil. A nice green plant, ideal for spawning both gold and tropical fish.

Per bunch.....\$0.15 6 for.....\$0.75

Ludwigia

One of the best liked ornamental aquarium plants. Easily rooted from cuttings.

Per bunch.....\$0.15 6 for.....\$0.75

Cryptocoryne willisi

A very popular and ornamental plant in tropical and goldfish tanks.

Each.....\$0.10 3 for.....\$0.25
Dozen.....\$0.75

Cryptocoryne cordatum

A slightly wider leaved plant than willisi, top of leaf a beautiful shade of green, bottom of leaf red.

Each.....\$0.20 3 for.....\$0.50
Dozen.....\$1.50

Cryptocoryne griffithi

Broad leaved with nice variegation of darker shades in leaves. Considered the best of all cryptocorynes.

Each.....\$0.30 3 for.....\$0.75

Cryptocoryne beckettii

A dwarf variety of light green foliage.

Each.....\$0.20 3 for.....\$0.60
Dozen.....\$1.50

Potamogeton densus

A fine bunchy growing plant which floats near the surface affording protection to young fish.

Per portion.....\$0.25

Bacoba

A green foliage plant, very similar to Ludwigia, except that the leaves are more fleshy and rounded.

Per bunch.....\$0.20 3 for.....\$0.50

Ceterophyllum

Common name, horn wort or Marestail. It is easily grown and provides a fair protection to newly born fish.

Per bunch.....\$0.15 6 for.....\$0.75

Cellophane plant

A newer aquatic with light green nearly transparent leaves.

Each.....\$0.35 3 for.....\$1.00

Nephtytis liberica

Aquatic Arrowhead. A nice plant with arrow shaped leaves which prefer to grow above water.

Each.....\$0.25 3 for.....\$0.60

Madagascar Dwarf Aquarium lily

Makes nice blue flowers above water. For tanks over 10-gallon capacity. Must be grown in pot with soil.

Each\$1.00

Dwarf Broad-Leaf Sagittaria

The leaves form a rosette and are about 1/4 inch wide and 3 to 4 inches long.

Each.....\$0.05 Dozen.....\$0.50

Ludwigia

Ceterophyllum
(hornwort)

Cryptocoryne Griffithi

AQUARIUMS CAN BE PLANTED AT ANY TIME OF THE YEAR

Water Lettuce

Water Fern

Banana Plant

Dwarf Anacharis

Hairgrass

Water Sprite

Southern Spatterdock

TRY BELDT'S GREENHOUSE-GROWN PLANTS IN YOUR AQUARIUM

Water Sprite

A fern-like plant of light green foliage which is of recent introduction and has made many friends.

Each.....\$0.20 3 for.....\$0.50

Dwarf anacharis

A dwarf variety of elodea especially suited to smaller tanks but equally effective in larger aquariums.

Per bunch, \$0.15. 3 for \$0.40

Southern spatterdock

A beautiful foliage plant which has a delicate light green color.

Each.....\$0.25 3 for.....\$0.60

Round leaf spatterdock

A smaller variety with round leaves.

Each.....\$0.15 3 for.....\$0.40
Dozen.....\$1.25

Hairgrass

A well-liked small dense growing grass which forms small leaves about 4 inches long.

Per portion\$0.35

Banana plant

A novelty plant which is very popular. Grows from the seeds of the snowflake lily, the seed formation growth resembling a miniature bunch of bananas from which the leaves sprout.

Each.....\$0.15 4 for.....\$0.50

Echinoderus Radicans

Formerly known as sagittaria guyanensis. Broad green leaves, 5 inches long, are produced from a single root growth.

Each\$0.50

Water Snowflake

A lily-like aquatic plant; the leaves float on the water surface; requires sufficient sunlight.

Each\$0.25

Aponogeton fenestralis

Madagascar lace plant, the finest and rarest of all aquatic plants. The thick leaves form a lacy perforated growth.

Each\$10.00

Aponogeton Ulvaceum

A beautiful aquatic plant of recent introduction belonging to the Madagascar Lace Leaf family. Beautiful light green leaves about 5 inches long, forming a rosette.

Each\$1.50

Aponogeton Crispum

Also of recent introduction, produces medium green, curly edged leaves, all of which grow from a center root. A very attractive plant.

Each\$1.25

Amazon Sword Plant

The foliage is similar to sagittaria sinensis only stronger and the growth is more symmetrical and many more leaves are produced.

Each.....\$0.35 3 for.....\$1.00

Brazilian Under Water Fern

This plant of recent introduction produces waxy green leaves about 4 inches long.

Each\$0.50

Potamogeton Crispus

A plant similar in growth to Ludwigia, except the leaves are long, much like cryptocoryne willisi but the plants grow more compact.

Per bunch...\$0.15 3 for...\$0.40

Fanciers' Special Collections**Collection No. 1**

A 5-gallon aquarium collection of assorted plants, postpaid \$0.65

Collection No. 2

A fine collection of aquarium plants for 10-gallon aquarium. Postpaid\$1.25

BOG PLANTS

Plants which grow above the water, but roots must be submerged in flower pots. All suitable for aquariums indoors.

Umbrella Palm

The most popular of these varieties.

Each\$0.25

Spiral Palm

Similar to Umbrella Palm, except that the leaves grow in perfect spiral shape.

Each\$0.25

Hedychium coronarium

A beautiful foliage plant similar to water canna; easily grown if pot is kept in water. This feature applies to all of these bog plants. Try some of them.

Each.....\$0.35 3 for.....\$1.00

Supreme Collection

Three Cryptocoryne willisi, 3 Cryptocoryne cordatum, 3 Cryptocoryne griffithi, 2 Japanese Spatterdock, \$1.50.

Rarity Collection

One each of the following plants: Floating Fern, Round Leaf Spatterdock, C. Griffithi, C. Cordatum, Amazon Sword Plant, Cork Screw Vallisneria Water Poppy, Bacoba, Hairgrass, Madagascar Dwarf Aquarium Lily—Special for...\$2.50

Fanciers' Special

Fanciers, get our nice selection of plants to balance 15-gallon aquariums: Vallisneria, Elodea, Round Leaf Japanese Spatterdock, Sagittaria, etc. Enough plants for ornamental, and practical planting of your aquarium. Including one Cryptocoryne griffithi, free. For only \$1.25, postpaid.

African four leaf clover

A nice aquatic plant resembling four leaf clover. Each leaf is produced on a single stem.

Each.....\$0.20 3 for.....\$0.50

FLOATING PLANTS**Water Lettuce**

A floating plant requiring several hours' direct sunlight daily to bring to perfection.

Each.....\$0.10 3 for.....\$0.25

Floating Fern

The most popular floating plant does not require very much sunlight. Ideal for baby fish to hide over partly submerged leaves; young plants grow right from the leaves.

Each.....\$0.10 1 for.....\$0.40
Dozen.....\$0.75

Salvinia

Small leaves, 1/2 inch across, are formed in clusters.

Per portion.....\$0.35

Duck Weed

A well-known small floating plant.

Per portion.....\$0.25

Water Hyacinth

A floating plant which is very popular for spawning, as the roots, which are dense and bushy, afford a lot of protection to the eggs. Used extensively in goldfish pools and for spawning tropicals.

Each.....\$0.10 Dozen.....\$1.00

Parrotsfeather

A trailing plant of light green foliage which grows above water level.

Per bunch...\$0.15 Dozen...\$1.25

Floating Plant Collection

Six varieties. \$1.00 postpaid.

Water poppy

A well-liked plant. The waxy green leaves reach the water surface and give a decided lily-like effect.

Each.....\$0.15 6 for.....\$0.75

Utricularia minor

Common name, Bladderwort. A dense growing floating plant, ideal for breeding purpose.

Per portion.....\$0.35

Crystalwort

Another well-liked floating plant with a light green foliage of fine crystal-like threads.

Per portion.....\$0.35

Sea Breeze, N. Y.

Received the goldfish I ordered from you in excellent condition. Of the 400 ordered but two were dead. It seems almost impossible that they would come such a distance and be so lively at their journey's end. The count was good, and also the selection. I sure am well pleased.

MRS. ARTHUR FLESCH.

Wichita, Kan.

Your fish were the healthiest I have ever received.

MRS. ED. CONEY.

UNCOLORED GOLDFISH FOR BAIT

Fishermen know that uncolored goldfish make the best bait minnows because they are hardy and do not have to be iced. You can keep them in your pool and have a supply on hand when you go fishing. Many of them may turn red later. Shipped in minimum quantities of 100 only.

Size 2 inch, per 100	\$2.00
Size 3 inch, per 100	3.00
Size 4 inch, per 100	4.00

Mixed sizes may be purchased in lots of 100.

Read These Directions When Ordering Goldfish

Goldfish are shipped via express. We ship in small cans up to 24 of the smaller sizes. These small cans are not returnable and 35c should be added to your order for this can. We ship 50 fish in a 5-gallon shipping can. These cans cost 50c each and are not returnable.

Orders calling for more than 50 fish are best shipped in large galvanized goldfish cans, holding 10 gallons of water. A \$3.00 deposit is required on these cans, which must be returned, 20c pre-paid, from anywhere in the United States.

We guarantee live delivery on all goldfish. If shipment should arrive in bad order, notify claim department at once, get an inspection report and mail this to us together with the empty can and we will replace lost fish, express charges prepaid. If, however, the loss constitutes a value below 50c, then keep the report, send it to your local claim department for collection of value of loss. Kindly understand that unless we make a minimum provision so low as a 50c loss, it is merely to prevent claims that may amount to only 10c and the time and postage consumed in that case would be many times the actual value of loss.

Only Beldt's Aquarium Offers Such a Wide Selection of Exotic Fishes at Lower Prices

Our large volume of production enables us to save you considerable money on your Tropical Fish purchases. Our 20 years of experience in shipping and breeding Fancy Fish assures you complete satisfaction. You not only save money but you also get good and strong developed stock. Order your Tropical Fish from Beldt's.

ALL PRICES QUOTED ARE FOR LARGE BREEDING SIZE FISH

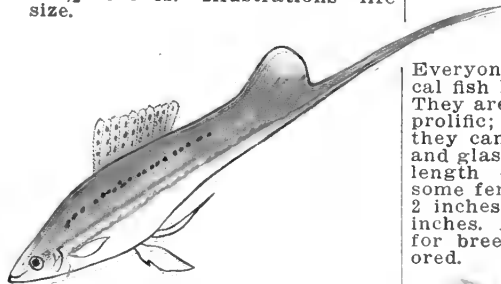

LIVE BEARERS

(Viviparous Killifishes)
These Fish Bring Forth Their Young Alive.

SWORDTAILS OR HELLERI

Live Bearer

Swordtails are very popular. They are native in Mexico and Central America. The male develops a long spike. The original swordtail here listed are the Montezuma and helleri. All other varieties are the product of line breeding and hybridization. Some of them grow to a length of approximately 3/4-inch when full grown. The average size is about 2-2 1/2 inches. Illustrations life size.

*Domino Helleri

A hybrid Swordtail with 4 to 5 beautiful color variations, producing a short Swordtail.

Large breeders, pair.....\$1.50
Young, 1-inch, each..... .30
4 for..... 1.00

Live bearing, exotic fishes are very popular with the amateur, as no experience is necessary in order to breed these successfully. All you need is a good grade of prepared fish food so that the fish will have the proper nourishment, and nature will take care of the breeding end of it. Provide fine, bushy plants in the aquariums or separate the females and put them in a bowl by themselves when they look like they may be ready to have young.

GUPPY

Live Bearer

Everyone acquainted with tropical fish knows the Guppy family. They are all very hardy and very prolific; being colorful and small, they can be kept in small vases and glass jars. The males reach a length of 1 1/4 inches, whereas some females will get as large as 2 inches; average size about 1 1/4 inches. All of our quotations are for breeding size fish, fully colored.

CICHLIDS

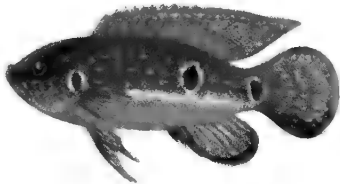

Most of these fish are from South America. The Amazon Basin offers quite a variety of these miniature foreign fishes. The Scalare or Angel Fish is a member of this family, as are all the other varieties listed under this heading. Most all of them lay their eggs on hard, smooth surfaces and when the eggs are hatched, take care of the young. An exception to this rule is the mouthbreeder. The female carries the eggs in her mouth for about ten days to two weeks in a special pouch. Their interesting breeding habits, and also their beauty, has made Cichlids one of the aquarist's favorite fish and no collection is considered complete without them.

Pterophyllum Scalare (Angel Fish)

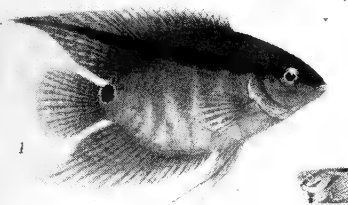

We guarantee live delivery on tropical fish shipments, and upon receipt of inspection report replace losses, EXPRESS CHARGES PREPAID, except when loss is less than \$1.50, in which case we issue credit for full amounts, and have this recorded on this inspection report.

Labyrinth Fish

These Fish Build Bubble Nests

All Labyrinth Fish listed here are native in Southern Asia, such as India, South China, Island of the Burneo. All of these varieties build nests under floating leaves so that the nests are protected from rain. These nests are formed through the use of mucus and tiny plant life such as algae. Some varieties do not bother about building any nests. The eggs just float on the water's surface and are guarded by the male. Most all of the eggs hatch in 36 hours.

How We Ship Tropical Fish

During the summer months tropical fish are shipped in plain metal cans. Add 35c to your order. If the weather is cold and during winter months we pack these cans especially protected against cold weather in a special insulated carton. During cold weather add 25c extra for winter packing or a total of 60c for the shipping container. These containers are not returnable, but as they are very light in weight, they reduce express charges.

We also ship in special thermos shipping cans during cold weather. These cans are returnable and a \$3.00 deposit required on these is refunded if the container is returned within seven days.

A rental charge of 25c per week is made against the deposit on special thermos cans held longer than one week after receipt of shipment. We guarantee live delivery, but do not assume responsibilities for losses after shipment is received in good order. If a shipment arrives in bad order and there should be any dead fish in the can, call the Railway Express Agency Claim Department same day as shipment is received. Get an inspection report and mail this to us.

Be sure to take the water temperature during winter months and have this recorded on this inspection report.

No. 40 Aphyosemion	
(Ribbon tail panchax). Per pair	2.50

Here is a collection of extreme interest for the advanced aquarist as well as the novice. Killifish are quiet and will, sometimes for several minutes, stand in the same position without showing a sign of life. When food is thrown into the aquarium they dart quickly and snap the food. They can jump after the food high out of the water. The aquarium should be covered with glass.

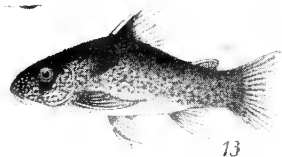

South American Armored Scavenger Catfishes (Corydoras)

Illustrations are natural size. These small catfishes are peaceful and good scavengers, very interesting, popular and hardy.

INTERESTING BOOKS FOR THE FISH FANCIER

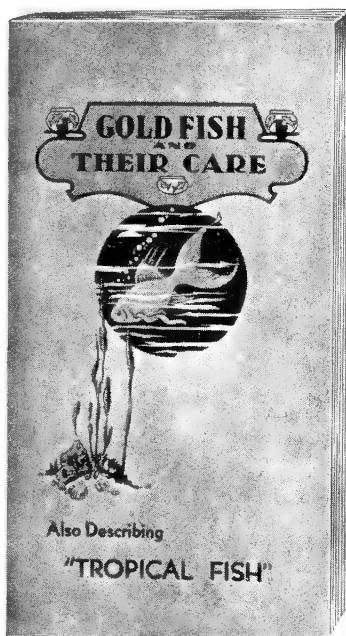

"Exotic Aquarium Fishes."

By WILLIAM T. INNES

This 460-page book with 41 color plates and 290 black and white illustrations is one that everyone interested in Aquarium Fishes should own. It contains only such fishes that have actually been imported, giving the popular name (if any), the scientific name, its pronunciation and meaning, the native habitat and a key reference to a world map, which is printed on the fly-leaf. There are also 7 maps which show the world distribution of the 7 most important families of Aquarium Fish; 78 pages are devoted to Aquarium Management, Plants, Diseases, Enemies, etc. There are also sections on Wholesale Breeding, Collection and Transportation, Miscellaneous Information, and Rules for Fish and Aquarium Competition.

One is at once impressed by the quality print job, which is most outstanding. The author must have put his heart and soul into this book. When going through the pages you imagine he is talking to you in person. The only thing missing is his photograph. By far the best book on this subject.

Price Postpaid \$5.00

"Goldfish and Their Care"

By OTTO BELDT

LIVE FISH FOODS

White Worms (Enchytra)

Large portion, \$1.00 postpaid

To propagate white worms, fill a small box about 12 inches square and 12 inches deep with good garden soil to a depth of 8 inches; keep a piece of slate or glass on top to keep soil from drying. Keep dirt moist. Feed mashed potatoes, boiled rice, bread soaked in milk. See that all food is covered with dirt. Breeding temperatures best between 50 and 75° F.

Gammarus

An ideal live food. They grow about 1/2 inch long and can be propagated in half barrels. Will eat any kind of fish food. Portion enough to start for breeding, including shipping can,

\$1.00

Live Daphnia

If you wish to raise your own daphnia, get a can of live daphnia and one package of our Infusoria Powder, which is also used for raising daphnia. Complete directions with every package. Live daphnia, including shipping can.....\$1.50

Brine Shrimp Eggs

The eggs will keep indefinitely. Young hatch in 24 hours, and make ideal live food for tropicals. Full directions with each package.

Per carton Postpaid 75 Cents

Tubifex Worms

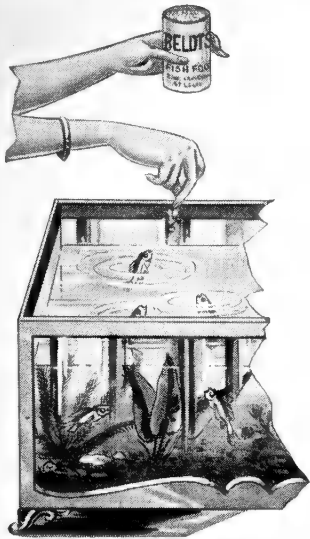

A small reddish colored worm, similar to white worms. They will live under water for months, making it possible to feed your fish enough for several days if you are away. Per portion,

Including shipping can \$1.00

Infusoria Cultures

Various microscopic life forms the foundation of water life. Without these creatures there would hardly be a living thing in water. Infusoria is used for feeding tiny baby egg-layers of all tropical, goldfish and most all fresh water game fish subsist on this microscopic life during the first few weeks of their existence. We can supply following cultures: paramecium, philodino, Euglena, and monostyla. These cultures cannot be shipped in zero weather on account of water freezing. Each culture is sent postpaid for

MATTHEWS ARD.

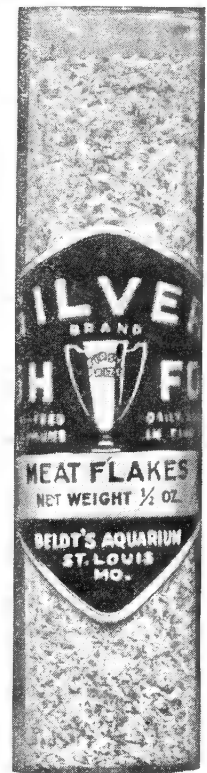

SILVER BRAND FISH FOODS

A good fishfood is essential to keep the fish in good health. Our "Silver Brand" fishfoods are the finest scientifically prepared foods for all aquarium fishes. We have years of experience breeding tropical and goldfish, and inferior foods result mostly in sick fish, lost colors and run down conditions. Many fanciers are not aware of the fact that a poor fishfood results in diseases which no remedy will cure, because the fish are too run down to respond to any treatment. In many cases only a good fishfood is all that is required to bring them back to health instead of a lot of chemical preparations. Request your dealer to stock our foods and do not accept inferior brands made by people who never owned a fish in their lives. All of our high grade fishfoods, put up in glass jars to keep them fresh and moist, do not contain any kind of filler such as meal or flour to produce quantity instead of quality. Most of these fillers produce constipation and the fish are soon run down and subject to all kinds of diseases. Stop using them and you will have better and healthier fish.

BELDT'S RELIABLE REMEDIES

**Magic Infusoria Powder**

Size of Package, 4x2½ Inches
Beldt's Magic Infusoria Powder

One eight-ounce box is enough to produce fifty gallons of infusoria. When breeding egg-laying tropicals or goldfish, the young, after they are able to swim, must be fed on infusoria. All young live bearing fish can be fed on infusoria for about ten days. This powder, which is guaranteed to produce the best infusoria culture, should be on hand. In case you do have some egg-layers to spawn, you will need these small infusoria microbes for food.

 Spots

Beldt's Fungus and Ich Remedy

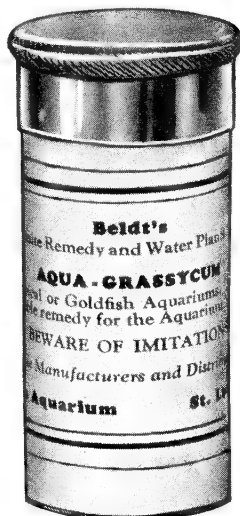

This is the most effective remedy for fungus, tail rot, and especially ichthyophthirius on tropical fish. Symptoms: Folded fins, fish wiggle, and seem to be unable to swim, scratch themselves on sand. Tropical fish have tiny white spots on bodies—cotton-like growth. This remedy should be on hand as these diseases are contagious and spread rapidly. Complete directions with every bottle.

Price, 1 oz. Bottle, \$0.30, postpaid.

Jesup, Iowa.
 I am writing to tell you how much I appreciated the information you gave to me about my fish, and the treatment you recommended for black fungus. The Special Pool Remedy has done wonders for me. It has almost entirely cleared the pool. The fish were quite badly infested, and I sure do think that the results are wonderful. You can use my name for recommendation if you wish. DR. A. C. KNOWLES.

AQUARIUM MANAGEMENT

Aquarium Management

Never use gravel or too many shells for the bottom of an aquarium. Food and refuse will accumulate among them, because fish and scavengers have no access to it. It will cause the water to spoil and roots of plants to get black, and acid conditions resulting in the death of your pets. Use only clean river sand, one that is not too fine, yet not too coarse. Never place the fish in fresh water, it contains too much oxygen, also too many chemicals. After aging water for about a week, it is much safer than fresh water. A positive prevention against disease is to heat the water and let it age for about a week. All danger of ich can in this way be eliminated. Never keep the water in any kind of metal containers. Green water is caused by excessive sunlight or insufficient plant life. Two or three hours of direct sunlight per day is not too much. If the aquarium gets green it will clear up if covered with brown paper. Also floating plants help keep it clear. If you can not provide an eastern or southern exposure get an electric reflector and let it burn at least two hours in the evening; it stimulates plant growth. Bad smelling water is

the result of either too much food or the wrong kind. Do not underestimate the value of sufficient plants and some scavengers. When cleaning your aquarium try to save as much of the old water as possible. Strain it through a towel and use it over as it is much safer than too much new water. As a rule one-third new water never gives any ill effects even if it has not been aged, just so it is tempered properly. Occasionally syphon off the dirt on the bottom and replace it with fresh tempered water; this is more beneficial than harmful. It is best to keep two aquariums, one to use for quarantine purposes of newly purchased fish. Observe them for a week before placing them with your valued stock. When you get fish via express save all the water in which they come, and add old water to same. This will minimize the difference in chemical contents of the water. It also is a good precaution to add two drops of fungus remedy to the water. Good, clear water in an aquarium is very essential. It contains more oxygen and creates a better plant life. Plants absorb the impurities which create carbonic acid gas and throw off oxygen which the fish require. Therefore, a balanced condition can be created by

keeping a certain amount of plants and fish life in an aquarium, and such an aquarium does not have to be cleaned more often than once in six months to one year. Science has made aquarium keeping extremely simple. Automatically controlled aquarium heaters are perhaps the greatest benefit ever devised for the tropical aquarium. The proper temperature is from 72 to 80 degrees F. Chemical aquarium testing kits will help you determine the exact acid or alkaline conditions and the chemicals coming with these kits help you to neutralize the water. Unless one intends to go in for breeding, scientifically prepared foods usually cover a most complete diet. Medicated aquarium balls will help to prevent acid conditions. Feed as much food as the fish will consume in about thirty minutes. Use the dip tube to remove excess foods and refuse from the bottom occasionally. The glass may be kept clean with fine steel wool; small pieces of steel wool which may drop in the water are not injurious, but rather beneficial. Air pumps are a great aid for large community tanks. Many more fish may be kept in an artificially aerated tank than if you only depend on the function of plant life. Glass feeding rings

are more necessary than most fanciers realize. How would you like your dinner spread all over the table? Feeding rings help keep the aquarium clean. Glass covers are necessary on all heated aquariums, they help to retain the heat; many tropicals also like to jump out. A few bushy floating plants such as *Utricularia minor* (Bladderwort) or *potamogeton densus* in which newly born fish may hide prove one of the best paying investments. Do not be pennywise and pound foolish. Before investing a dime in fish, secure the proper equipment to keep them. Too many beginners make the mistake and invest \$3.00 in a cheap tank and heater and seven dollars in fish. If this investment were reversed, you would profit in the end. Do not try to start the fish hobby without first reading a reliable book on this subject. Investigate before you invest.

Demand Our Goods From Your Local Dealer

Many dealers carry our supplies, such as foods, aquariums, fish, plants, and supplies. If your dealer does not stock them, demand them, and he will be only too glad to stock them for you. We shall be glad to have your dealer's name and address.

A NATURAL POOL

This type pool is suitable for larger estates. Various hardy water lilies, bog plants and ornamental grasses give it a natural effect. Tropical lilies may be planted near the shore line for additional beauty and color effect.

Tripod Magnifier

The Tripod Magnifier is highly satisfactory for students' use in elementary Nature Study, such as Biology, Botany, Entomology, and other simple laboratory tasks.

This microscope is of the tripod type and is placed directly over the specimen to be examined. The magnifier is a double lens type of 7.5X in a threaded mount for focusing.

This mounting makes this magnifier desirable for a wide variety of work where simplicity and low cost are essential.

This magnifier is very good for testing infusoria cultures. For best results place a drop of the culture on a small mirror.

Price, each.....\$1.00

Washed Meramec Sand for Aquariums

It is very important to use the right kind of sand for the bottom of an aquarium. Meramec sand answers this purpose. White sand packs too tight and does not allow the roots of plants to grow right; on the other hand, if sand is too coarse, fishfood and refuse collect among same, causing water to decompose and get cloudy. Meramec sand is put up in the following size packages:

Size	Each
10-lb. sack.....	\$0.60
25-lb. sack.....	1.00
50-lb. sack.....	1.60
100-lb. sack.....	3.00

Prices F. O. B. St. Louis

We can ship Meramec sand via freight only if freight charges are remitted with order, as we cannot make C. O. D. charges for freight; however, we can ship Meramec sand via express, express charges collect.

Magnifiers

For testing Infusoria. Put a drop of Infusoria water on a piece of glass, hold light underneath. If the culture is good there should be at least 50 microbes to the drop.

Price of Magnifier, each.....\$0.25

Special Offer

One large can of Magic Infusoria Powder with Magnifier\$0.65

Complete directions to use this Infusoria Powder with the package.

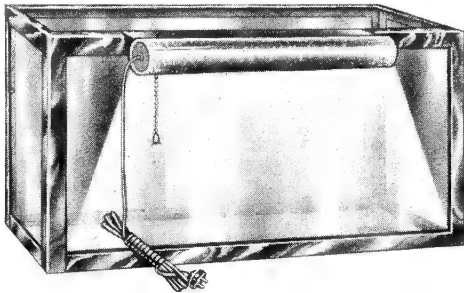

AQUARIUM HEATERS AND REFLECTORS

Top Light Aquarium Reflector

Fits Any Aquarium Made from Metal Angles

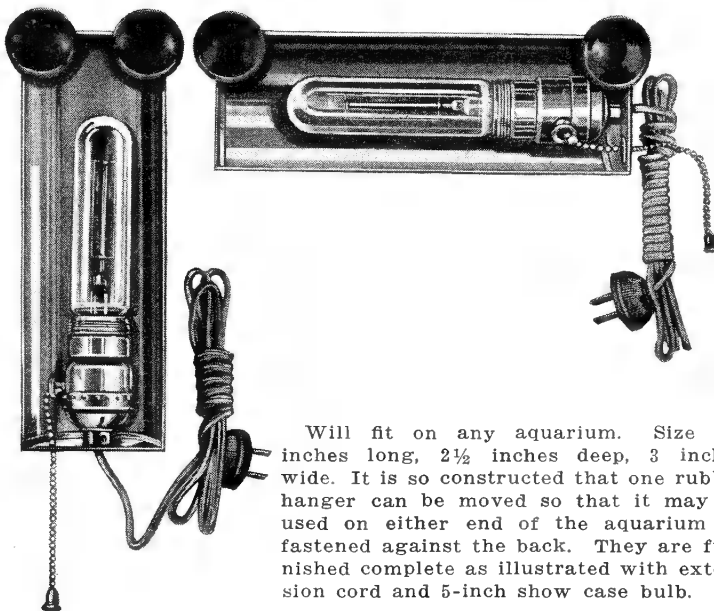

If turned on during the evening hours the light stimulates plant growth.

Two bulb—16 inches long. Complete with General Electric Show Case Bulbs\$2.50

These reflectors have universal hangers fitting any aquarium. They are furnished complete with bulbs, hangers and extension cords. The bulbs supplied with these outfits are regular 5-inch long clear G. E. show case bulbs.

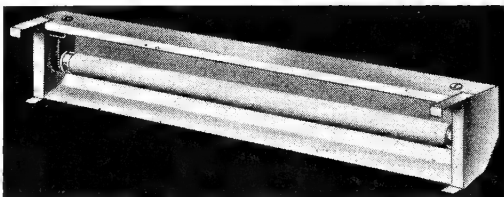

Supreme Aquarium Reflector

Will fit on any aquarium. Size 8½ inches long, 2½ inches deep, 3 inches wide. It is so constructed that one rubber hanger can be moved so that it may be used on either end of the aquarium or fastened against the back. They are furnished complete as illustrated with extension cord and 5-inch show case bulb.

Price each, with 5-inch General Electric Show Case Bulbs.....\$1.80
3 for 5.00

Fluorescent Light Reflectors

These tubular bulbs are coated inside with fluorescent powders which glow when stimulated by short wave ultra-violet light. This is an ideal aquarium reflector as it brings out all of the beautiful colors and creates a very good plant growth. It is the finest substitution for sunlight. Ideal for dealer's display tanks and home aquariums. Why not enjoy your fish aquarium at night?

Please note that a 15-watt fluorescent lamp produces about 4 times as much light as a regular light bulb.

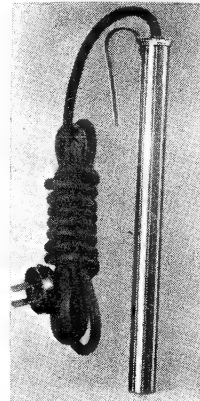

Special General Cartridge Heater

For 50 to 100 gallon aquariums, with special 200 watt element mounted in 16-inch solid brass tube, chromium-plated, for aquariums having a minimum depth of 18 inches.

Price each (guaranteed for one year).....\$9.75

Length	age	Finish	Plated
20 in.	15	\$6.75	\$8.00
26 in.	20	7.25	8.25
38 in.	30	8.25	9.00

These prices include of course the bulb and extension cord, also auxiliary equipment for use on 60-cycle alternating current. They are also made to special order for direct current.

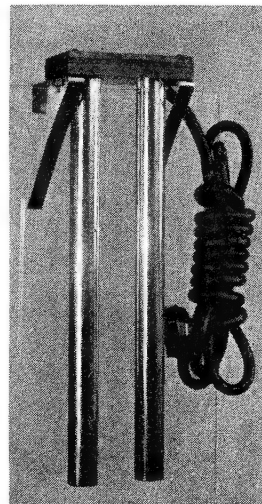

No. 4

Special Chrome Heater

These heaters are 9¼ inches long and are supplied complete with hanger and extension cord. Can be had in 40-watt for 12-15 gallon tanks; 60-watt for 16 to 20-gallon tanks; 80-watt for 21 to 35-gallon tanks; 100-watt for 35 to 50-gallon tanks. Do not fail to state capacity when ordering.

Price each.....\$2.10

No. 3

Automatic Chrome Heater

The heating element as well as the thermostatic control are housed in chromium plated brass tubing 9¾ inches long. Nothing to break. 100-watt capacity. For aquariums from 5 to 25-gallon capacity.

Price each.....\$4.00

718 Center St.,
Cairo, Ill.

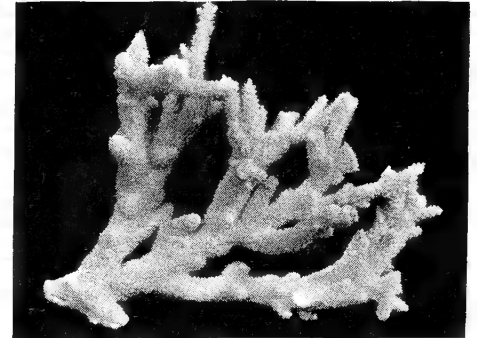

The aquarium purchased from you while in your city is really worth more than its price.

VIVIAN WALKER.

Box 743,
Lewiston, Pa.

J. ARTHUR WALLIZE.

Deep Sea Coral

Bring a bit of the South Seas into your aquarium. This coral is bleached white and can be supplied in branches of various sizes priced 25c, 35c, 50c, 75c and \$1.00 each according to sizes and beauty of formations.

General Aquarium Heater With Cartridge Element

110-120 Volts

This is a heater for large aquariums. Has an overall length of 10 inches; width 2½ inches. Will maintain a temperature of 75° F. in aquariums up to 50 gallons.

Three paramount virtues of this heater: Sensitive, non-radio interfering, and sealed thermostat. Heavy brass tube chromium-plated. Cartridge element. Waterproof mounting to keep drip water from getting into mechanism. The mounting must be kept above water level. Guaranteed for one year.

Price each.....\$7.50

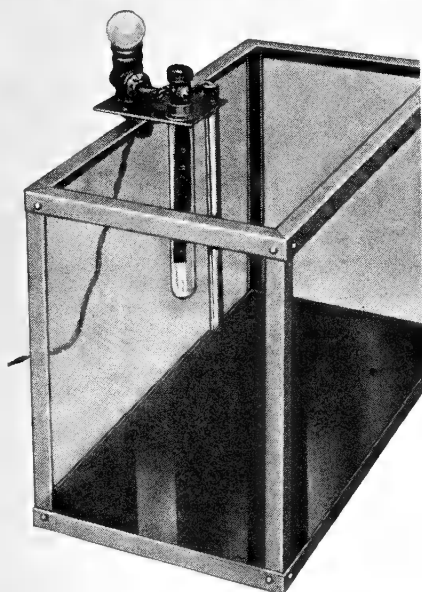

Chrome Reflector

This reflector is 8 inches long, comes complete with switch, hangers, extension cord and General Electric show case bulb.

Price each.....\$1.50

GUARANTEED ELECTRIC AQUARIUM HEATERS

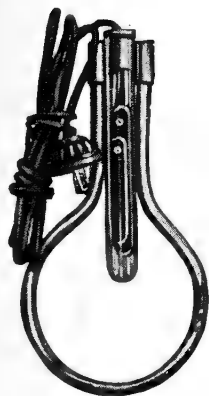

NO. 1 HEATER
PRICE \$6.75

With Cartridge Element

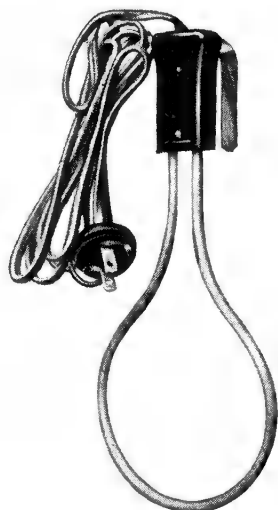

No. 1. Automatic with pilot light indicator has a double socket, and two heaters can be used thermostatically for two different aquariums if desired. Also two heaters can be used in one aquarium, that is if the aquarium has a capacity of 50 gallons or more, two heaters would be necessary to heat it efficiently if the very large aquariums are kept in cold rooms. Each heater will heat aquariums from 10 to 45-gallon capacity. This immersion heater is constructed with a special chromalox element. The element is guaranteed for one year. No. 1 outfit furnished complete with one heater as illustrated.

Additional heaters, each.....\$4.00

No. 2 HEATER
PRICE \$4.25

This **No. 2** heater is built into one unit complete with thermostatic control, which is enclosed in a 6 in. x 3/4 in. glass tube. The heating element housing is made from heavy copper tubing which is nickel-plated, then chromium-plated. They last quite a number of years continually submerged in water. A good feature not to be overlooked is the fact that the heating element can be easily replaced for only 35c postpaid in case it burns out. A very popular and serviceable heater for aquariums holding 15 to 35 gallons of water.

NO. 5 HEATER
Price \$1.25

No. 5. These heaters come in single watts for following size aquariums. **Don't forget to state gallon capacity of your aquarium or wattage desired.** We can supply them as follows:

- 2 to 4 gal. tanks, 10-watt.
- 4 to 5 gal. tanks, 20-watt.
- 6 to 9 gal. tanks, 30-watt.
- 9 to 15 gal. tanks, 40-watt.
- 16 to 25 gal. tanks, 60-watt.
- 25 to 35 gal. tanks, 80-watt.

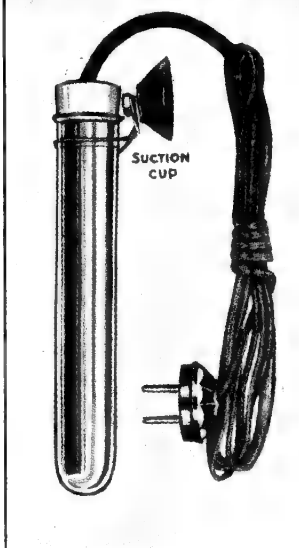

Any of these priced at.....\$1.50

No. 5 heaters can also be supplied to be used on 32-volt generating plants in 30 and 60 watts at \$1.50 each.

NOTICE

The heating elements in **No. 2** and **No. 5** heaters can be replaced when burned out. Price of additional elements, each 35c. Installation of elements very simple. Element in **No. 1** heater guaranteed for one year.

GLASS TUBE HEATER

These heaters are now supplied with special metal hanger instead of suction cup hanger.

Glass Tube Heaters

Built-in Pyrex Tubes

These Glass Tube Heaters are supplied with waterproof tops, rubber suction hangers, and complete with plug and 6-foot extension cords.

6-Inch Heater

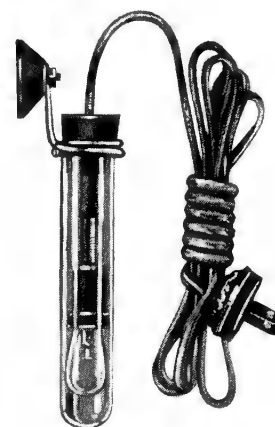

6-inch heaters can be supplied in following wattages: 10-watt, 20-watt, 30-watt.

Price complete, each.....\$1.00

8-Inch Heater

8-inch glass tube heaters can be supplied in 40-watt, 60-watt, 80-watt. Complete as illustrated.

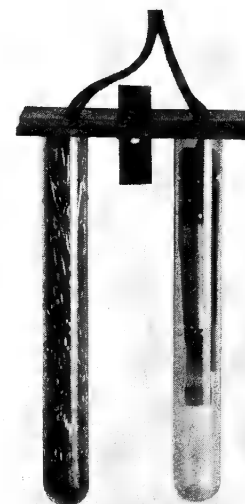

Each\$1.25

Submerged Aquarium Reflector

This reflector is made to hang on the inside in the aquarium. It is five inches long and one inch in diameter. Besides light, it also produces a little heat which makes it very practical for tropical aquariums. Supplied complete with bulb, rubber hanger and rubber extension cord.

Price each.....\$1.25

No. 6

The "Watchman" Automatic Glass Tube Heater No. 6

Built-in Pyrex Tubes

This automatic heater is designed for aquariums from 4 to 20-gallon capacity. The thermostat is set to maintain a temperature of 76° F. However an adjustment is possible by turning the small set screw on the back plate. A fraction turn to the right increases the temperature.

Price each.....\$2.50

3 for 7.00

All of Our Automatic Heaters Are Fitted with Condensers to Prevent Radio Interference

ARE BELDT'S HEATERS SATISFACTORY?

Wenatchee, Wash.

You probably think it odd that I should send all the way to your aquarium but I find that your service is much more rapid than many of the coast cities.

JIM ELMORE.

Detroit, Mich.

The things we ordered arrived safely, and thank you for such prompt service.

MRS. JAMES HELKA.

Dayton, Ohio.

Since we have installed the heater purchased from you, the temperature has been kept very regular.

SEGFRIED R. WENG,
Director, Dayton Art Institute.

Terre Haute, Ind.

The heaters which I received from you are very satisfactory.

MRS. R. F. KINGERY.

Black River Falls, Wis.

The heater and thermostat you sent me a few weeks ago have proved most satisfactory.

ERWIN PETERSON.

THERMOSTATIC CONTROLS AND AIR RELEASERS

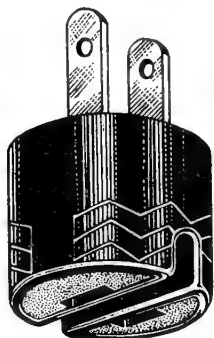

Illustration half size.

Condenser Plug

Each \$75c, postpaid

For the elimination of Radio interference, to be used with any type of thermostat you now have.

Note

When adjusting these thermostats, a fraction turn to the right increases the temperature and to the left lowers the temperature.

Schickerling Ultra Violet Lamps

These new patented Ultra Violet Lamps will operate on 110 volts A. C. or D. C. currents. Tropical fish and plants can be kept without sunlight in good growing condition and healthy. If you are unable to keep your fish in a southern or eastern exposure this is just what you need. For the winter months they are indispensable.

Fanciers Special Combination of four aquariums on one stand; three upper tanks are removable and the lower tank is built-in. Over-all length, 31 1/4 inches. Large top aquarium, 18 1/4 inches long, 10 inches wide, 12 inches high; 9 gallons. Two small side tanks, 9 3/4 inches long, 6 inches wide, 8 1/4 inches high; 2 gallons each. Bottom tank, 18 inches by 10 inches by 10 inches; 8 gallons. Total tank capacity, 21 gallons. Floor space, 31 1/4 inches by 11 inches.

Here is a complete compact unit for the amateur breeder. Use the center tank on top for displaying your fancy fish and breeders. Put the babies in the two small tanks, and half grown fish in the bottom tank. This will enable you to raise your own fish and keep up your display tank. A sturdy, well built unit, all welded. Finished in imitation wood; color, creamy and brown. Price complete.....\$20.00

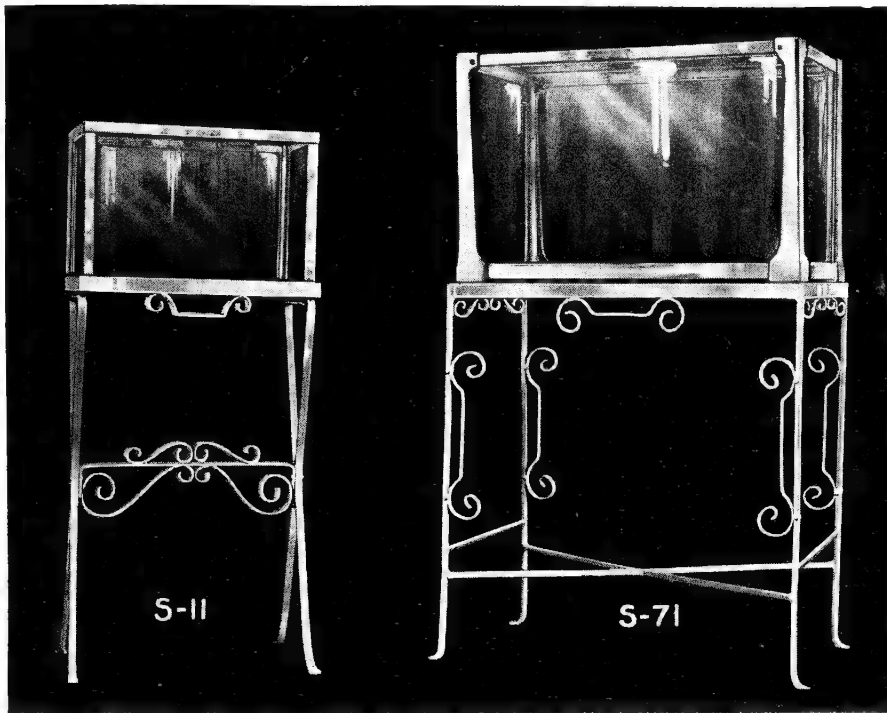

Bottom tank is made with polished edge plateglass. Shipping weight 60 lbs.

No. 30

This aquarium is made from double strength 1/2 in. window plate throughout. The heavy steel frame is securely welded and the entire frame is dipped in lacquer before the glass is cemented in, making it rustproof for years. Finished in grass green.

Evergreen, Ala.

The aquarium supplies which we received from you several weeks ago are being used with a great deal of pleasure and profit by my high school biology class. The baby black mollies were born about a week after the shipment arrived and are doing fine.

LILY H. MOORE.

Mendon, Mass.

I have received order No. 3159 in good condition and I am very much pleased.

GEORGE R. NEELY.

Pocatello, Ida.

Some time ago a friend gave me some food for my Guppies, which she said she had purchased from you. My fish seem to like it and thrive on it better than on any other food I've ever had.

MRS. J. G. CLARK,
The Willow's Fisheries.

Nyssa, Ore.

The fish seem to like your foods best of all I've tried. I sent some to my sister, and later she wrote that her fishes were spoiled—would not even notice other foods, but came like a bunch of pigs when she gave them Beldt's. Thanks for such good food for our pets.

MRS. H. H. WEIDEMAN.

SCAVENGERS FOR AQUARIUMS AND POOLS

Do not try to keep an aquarium or a pool without the proper kind of scavengers. They are very important in keeping an aquarium or pool clean. Clams should never be used in an aquarium. They should only be used in pools, as the average aquarium is much too small. Figure at least one snail to the gallon of water when keeping an aquarium, and if you use the large Japanese snails, use at least a dozen snails for each 50 gallons of water in the pool, and figure one Weatherfish for each 10 gallons of water in the aquarium besides the snails.

Water Newts or Salamanders are very interesting, but have no scavenger value. Tadpoles make very good scavengers in both pools and aquariums. Scavengers consume very little oxygen and, therefore, will not overcrowd the aquarium.

Add 15c postage for snail orders amounting to less than \$1.00.

Notice

We have discontinued the following snails, as they are very unsatisfactory: Marble snail, Columbian Ramshorn snail, and the Ampularia gigas or infusoria snails. All snails will produce infusoria if kept in a tank by themselves and fed on fresh lettuce leaves.

DIRECTIONS TO CUSTOMERS

WHEN WRITING IN REGARDS TO YOUR ORDERS

BE SURE TO MENTION ORDER NUMBER

Forwarding

All shipments of live stock are forwarded via express; also all glass articles. We guarantee glass articles only if forwarded via express and in case of damage in transit will replace all articles gratis only if a bad order is obtained from express company and mailed to us. We do not pay express charges on replacements or on original orders. We do not guarantee live stock sent through mail.

We do not pay postage or expressage on any shipments. All price quotations in this catalog are strictly net F. O. B. St. Louis except on items listed postpaid. Do not remit any money to cover express charges as these are collected when the express man delivers the goods. If you desire items sent parcel post, make your remittance large enough to cover postage. We can not guarantee parcel post shipments against damage or loss.

Correspondence

We can not give detailed information concerning breeding habits, etc., of fish. In order to properly do so would require hours of writing concerning some of the varieties. Include with all inquiries a self addressed and stamped envelope.

Claims

We can not entertain claims unless they are made within 3 days upon receipt of shipment.

Cash with Orders

Please send sufficient money with order to cover the whole bill. We decline to ship "Collect on Delivery" unless 50 per cent remittance be made to guarantee acceptance.

Shipping Cans

See directions for Goldfish shipping cans on page 21.

Directions for Tropical Fish Shipments and Shipping Cans on Page 23**Shipping Season**

We ship everything listed in this catalog all year around. During cold weather tropical fish are shipped in thermos cans. We reserve the right to delay orders, should weather conditions arise that may call for delays on shipments, and such delay, in no way, should be a cause for cancellation of orders.

Canadian Shipments

Obtain a permit to import plants from the Department of Agriculture, Ottawa, Ontario. Send us permit number. You keep the original copy of permit.

Non-Warranty

Various conditions, such as unfavorable weather, improper planting, etc., may cause poor results. We send out only first quality stock, but we give no warranty as to productiveness or description.

Selecting Tropical Fish

Not all varieties listed can be shipped in one can. Customers desiring only such varieties that can be kept together in one aquarium should order those marked * which are known as "Happy Family Fish."

Pairs

Quite often a fancier wishes to match odd fish in order to pair them. You can purchase either sex at one-half the catalog price as quoted for pairs, except Veiltail Bettas.

PRICES

All prices in the catalog are for orders received by mail only. At our retail store prices may vary from prices listed in this catalog.

Raw Materials

Owing to the uncertainty of being able to get exact raw materials for the manufacture of non-defense products, we reserve the right to use substitute materials, should we be compelled to do so. Such products shall, however, be practical and of equal value, or else be sold at a lower or higher price to conform to our high standard of value.

Taxes

All federal, state or local taxes imposed after this catalog is printed will be added to all prices.

**How to Figure Transportation Charges.**

An average order for tropical or goldfish weighs from 10 to 20 lbs. In order that you may determine express or parcel post rates from St. Louis we are listing below 5-lb. parcel post rates and 20-lb. express rates.

Medicated Aquarium and Pool Neutralizers

These medicated water neutralizers are necessary to counteract acid conditions in aquariums or pools. For aquariums, just use one at the time.

If water is acid they gradually disappear, depending on the amount of acidity in the water. For pools, they may be used one for each 100 gallons of water. They do not injure plants or fish; they only help to keep the water fresh and from becoming too acid.
